

DV Competency Continuum Activity

Instructions: At your table, review the DV Competency Continuum together. Identify which practices of your system are in which categories. Identify 6 specific practices your group thinks are important to work on. Then identify strategies to move up one level. Consider practice, policy and collaboration efforts that would help. There is an example listed.

Example:

Practice	Competency Level	Strategies for Improvement
No services and no coordination with criminal court for the perpetrator.	Destructive	Identify a protocol for contacting prosecutors' offices that includes requesting batterer intervention services for perpetrators and orders of protection; cross-train on the intersection of DV and child maltreatment with prosecutors' office; create form letter for requests that can be made of the prosecutors' offices that support child safety.

Practice	Competency Level	Strategies for Improvement
