Varicella ⁵						Varicella				Varicella			
Pneumococcal ⁶			PCV	PCV	PCV	PCV				PCV	PPV		
Influenza ⁷						Influenza (Yearly)				Influenza (Yearly)			
----- Vaccines below red line are for selected populations -----													
Hepatitis A ⁸										Hepatitis A Series			

This schedule indicates the recommended ages for routine administration of currently licensed childhood vaccines, as of December 1, 2004, for children through age 18 years. Any dose not given at the recommended age should be given at any subsequent visit when indicated and feasible.

■ Indicates age groups that warrant special effort to administer those vaccines not previously given. Additional vaccines may be licensed and recommended during the year. Licensed combination vaccines may be used whenever any components of the combination are indicated and the vaccine's other components are not

contraindicated. Providers should consult the manufacturers' package inserts for detailed recommendations. Clinically significant adverse events that follow immunization should be reported to the Vaccine Adverse Event Reporting System (VAERS). Guidance about how to obtain and complete a VAERS form can be found on the Internet: www.vaers.org or by calling 800-822-7967.

■ Range of recommended ages ■ Only if mother HBsAg(-)
 ■ Preadolescent assessment ■ Catch-up immunization
