

3. Oregon Safety Intervention Model

The Oregon Safety Intervention Model represents an overarching process that requires safety assessment and safety management at all stages of case management from screening through case closure.

The safety intervention model includes all actions and decisions required throughout the life of a case to:

- Assure that an unsafe child is protected;
- To support and facilitate the parent taking responsibility for the child's protection whenever possible;
- Reconfirm the child's safety at home or in out-of-home care throughout the life of the case; and
- To achieve the establishment of a safe, permanent home for the unsafe child.
