

## DESI Less-Than-Effective Drug List

An October 23, 1981 ruling by District of Columbia Federal Court directed the Department of Health and Human Services to stop reimbursement, effective October 30, 1981, under Medicaid and Medicare Part B for all DESI less-than-effective drugs which have reached the Federal Drug Administration Notice-of-Opportunity-for-Hearing stage.

Since this ruling means the Federal funding for these drugs will be terminated, payment for the following drugs will not be made by OMAP. The products' trade names and dosage forms are supplied for informational purposes. Thus, even though a drug's trade name or dosage form is not shown on this list, if by its generic make up and route of administration it is identical, similar, or related to a drug on this list, no Federal Financial Participation (FFP) is available for such a drug. Therefore, OMAP will not reimburse for DESI drugs or dispensings of products that are identical, related, or similar to the DESI drugs listed below.

In accordance with current policy, Federal financial participation will not be provided for any drug on the FUL listing for which the FDA has issued a notice of an opportunity for a hearing as a result of the Drug Efficacy Study and Implementation (DESI) program and the drug has been found to be a less than effective or is identical, related or similar (IRS) to the DESI drug. The DESI drug is identified by the Food and Drug Administration or reported by the drug manufacturer for purposes of the Medicaid drug rebate program.

The manufacturer has the responsibility of determining the DESI status of a drug product.
