(2) Instructions on completing claim forms, Administrative Rules and examples of some completed forms are included in the Speech-Language Pathology, Audiology and Hearing Aid Services guide. A section listing procedure codes and their definitions, restrictions and limitations is also included. An addendum includes documentation standards, requirements and recommended formats for the individual treatment record.

(3) The Office of Medical Assistance Programs (OMAP) endeavors to furnish medical providers with up-to-date billing, procedural information, and guidelines to keep pace with program changes and governmental requirements.

410-129-0220 Augmentative Communications System or Device

(1) The Office of Medical Assistance Programs (OMAP) will cover dedicated communication systems or devices and necessary attachments, (i.e. to bed or wheelchair).

(2) All requests for these systems, devices and necessary attachments will be reviewed for medical appropriateness.

(3) All required supporting documentation must be submitted prior to review. A form has been developed that outlines the necessary information required for review. A written narrative should be attached to provide a sufficient level of detail.

(4) If, in the opinion of OMAP, the clinical documentation furnished does not support the services requested, the request will be denied.

(5) Criteria: The following criteria must be met before any request for an augmentative communication system or device will be considered:

(a) A physician's statement of diagnosis and medical prognosis including the necessity to communicate medical needs must be submitted;

(b) A reliable and consistent motor response which can be used to communicate must be identified;

(c) As measured by standardized or observational tools, the individual must have the cognitive ability of:

(A) Object permanence -- ability to remember objects and realize they exist when they are not seen;

(B) Means end -- ability to anticipate events independent of those currently in progress. The ability to associate certain behaviors with actions that will follow.

(d) The client must be assessed by a team consisting of a Speech Pathologist and when appropriate an Occupational Therapist and/or Physical Therapist. Formal evaluation reports should be included;

(e) Devices evaluated must be documented with an explanation of why this particular device is best suited for this individual and why the device is the lowest level which will meet basic functional communication needs;

(f) There must be a documented trial of the selected device and a report on the success in using this device;

(g) A therapy treatment plan must be developed stating who will program the device, monitor and reevaluate the user on a periodic basis. Indicate the individual who will be responsible for carrying out the plan;

(h) Requests for Augmentative Communications Systems or Devices are sent to Office of Medical Assistance Programs;

(i) A vendor's price quotation for the device must accompany each request including where the device is to be shipped;

(j) Submit with the request for authorization for an augmentative communication system or device:

(A) A formal augmentative communication assessment report -- required elements are listed on the reverse of the OMAP 3047 form;

(B) A physician's prescription of diagnosis and prognosis (not a prescription for an augmentative device).

(6) OMAP will reimburse for the lowest level of service that meets the medical need.
