

Risk Level Definitions-Quick Reference Chart

Definitions include harm for various reasons including risks due to the informed choice(s) of the individual. Definitions exclude weather/natural disasters and power outages.

Risk Level	Predicted Outcome	30-Day Lookback	Harm Intervention
High Risk	Identified concern without mitigation will likely cause substantial injury or loss within next 30 days.	Consumer experienced substantial harm in past 30 days, harm will likely reoccur without mitigation.	Urgent medical intervention to treat injury or prevent significant deterioration or loss of functioning and/or law enforcement response, loss of housing, or financial loss over \$2,000.
Medium Risk	Identified concern without mitigation may likely cause minor injury or loss within 90 days.	Experienced minor injury or loss within past 30 days. Will reoccur or worsen if not mitigated.	Minor non-medical Intervention met by supports, housing secure, financial loss is \$2,000 or less.
Low Risk	Identified concern without mitigation may result in harm. Risk of harm not imminent/likely within next 90 days.	Harm occurred within last 30 days but is mitigated and unlikely to occur within next 90 days.	Risk concerns and mitigation efforts monitored.
No Risk	No identified concerns and no harm likely within next 90 days.	No harm in previous 30 days.	None

Substantial injury or loss: Urgent medical (hospital, Emergency room, Dr. office) intervention necessary to treat the injury or prevent significant health deterioration or loss of functioning, and/or, law enforcement involvement, loss of housing or financial loss exceeding \$2,000.

Minor injury or loss: Medical intervention is not needed (natural supports, home remedy/over the counter, or time heals), housing is secure, and/or financial losses would be \$2,000 or less.

Harm: Injury or loss of any severity
