| <input type="checkbox"/> ODDS Children's Residential Services | <input type="checkbox"/> Other (<i>please specify</i>): |
| <input type="checkbox"/> Child Welfare Programs | |

Action required:

When placing consumers into Dementia Contracted AFHs use the current criteria for full assist in cognition per a current CAPS assessment found in OAR 411.015.006:

- a. Full assistance in at least one of the four components of cognition; or
- b. Substantial Assistance in at least two of the four components

instead of current contract language, "dependent in three of eight domains of cognition" or "assist in three of the eight domains of cognition".

Communication between agency departments is key for the continued success of these placements. Contracted providers are required to be in compliance with licensing rules per their contract. This includes requesting a variance if the provider is a level 2 and the consumer they are screening a consumer with level 3 care needs.

If you notice anything concerning when visiting a consumer or a provider please engage all DHS parties needed. If you need to contact central office's contract team and are not sure who to contact you can always email specific.needs-contract.team@dhs.ohs.state.or.us

Reason for action:

Recent rule changes to OAR 411-015-0006 Activities of Daily Living (ADL) reduces the number of cognition domains that consumers are assessed for from eight to four.

The contract team will begin transitioning all AFH providers who currently hold a “Basic Dementia” or “Advanced Dementia” contract to the equivalent “Basic” or “Advanced” contract where the criteria of a dementia diagnosis and assessed level of cognition have been removed beginning 11/14/2017. The list of contracted AFHs will be updated as each new contract is executed.

Field/stakeholder review: Yes No

If yes, reviewed by: APD Policy and Operations
