<b>Authorizing Entity</b>	Branch #	Branch #	Branch #
<b>Benefit Plan</b>	Nursing Home	APD, KPS, or CMS State Plan	APD or KPS

## MMIS POC Tips

**\*For agency provider units, it is the number of hours multiplied by two. So, if you have 30 PC hours per service period, you would enter “60” for this section.**

**\*\*For agency mileage, it is the number of miles divided by 2. So, if you are authorizing 20 miles per service period, you would enter “10” for this section.**

- ✓ The POC line item must perfectly match the service plan in the CA/PS service plan.

This includes:

- Creating a new POC line item when a new assessment and service plan has been completed.
  - Matching the dates and units in the POC line item to what the service plan authorizes.
  - Ending a POC line item whenever the authorized amount of units changes, then creating a new POC line item with the new authorization.
  - Not invalidating a benefit, hours, or service plan segment in CA/PS if any services were provided during that time frame (unless you plan to recreate the segments).
- ✓ Update the service plan and the POC line item as soon as possible when changes occur. It is preferable to start In-Home Care Agency POCs at the beginning of the week if possible for billing purposes. However, if it needs to update in the middle of the week, please inform the agency right away of this change (please keep in mind that MMIS will not prorate hours for In-Home Care Agencies for partial weeks).
  - ✓ The provider must be notified as soon as possible when any changes occur.
  - ✓ Hours are authorized on a weekly basis for In-Home Care Agencies. Hours authorized in one week do not carry over into the following week.
  - ✓ Do not attempt to bypass any error messages.
  - ✓ Do not end the benefit line in CA/PS unless the consumer actually moves to another living situation (i.e. in-home to AFH). Benefit lines should not end if the individual is in the hospital or receiving skilled NH care.
