

How to Enroll a Client into Managed Care on the PHP Screen

Update MMIS from SCMS.....	slide 2-4
The new PHP.....	slide 5-9
Update the information.....	slide 10 – 12
PHP Overview	slide 13 - 14
PHP and exemptions.....	slide 15
PHP and TPL.....	slide 16
When to contact DMAP.....	slide 17
Disenrolling a client.....	slide 18 – 23
SPD/AAA exemption process...	slide 24 - 28

First, update to MMIS from SCMS

SCMS		MA0680		Fast Path:				EB

PHP overview

- The PHP screen displays current or most recent managed plan enrollment
- Enrollment begins on the next Monday or the Monday after
- Enrollment on the PHP screen updates to MMIS immediately
- Only SPD/AAA staff can exempt clients
- Clients can change their managed care plan at redetermination/recertification and when auto-enrolled

PHP Overview, continued: Update the CM Case First

- The new PHP screen can only be accessed from CM's SCMS screen.
- ***There must be an action on the CM case that will cause the SCMS screen to display in order to get to the new PHP screen.***
- Actions include compute, restore, new, medical, supplement. A change action will not cause SCMS to display.

PHP and Exemptions

- The new PHP screen will not be able to enroll anyone in managed care if one person on the case is exempt.
- The new PHP screen will not be able to exempt anyone if one person on the case is already enrolled.

PHP Won't Show the Client's TPL

- To find out if someone has TPL (TPR), look first on Recipient Information for the TPL Yes/No flag and then in the TPL subsystem if you need more information.
- If you are not able to enroll or exempt a client, contact CES, DMAP

When to contact the DMAP Client Services Enrollment Team (CES, DMAP)

- If the client is not enrolled in managed care and you can't enroll using the PHP enrollment screen.
 - For example: The PHP Enrollment screen can't enroll prior effective dates and the client needs to be enrolled in CareOregon beginning last month ("retro enrollment").
 - For example: The PHP Enrollment screen keeps giving you error messages that you can't get around or you can't enroll using the PHP Enrollment screen because someone on the case has been exempted or has TPL, etc.

How to Disenroll a Client from Managed Care on the PHP Screen and Reenroll in Another Plan

To disenroll, add the plan number, the disenrollment reason and press {F9}

```
